

WHAT IS AN INGRESS/EGRESS PROJECT

TREATMENT

Clear vegetation up to 20 feet along road edges or to the fence line; whichever is closest to the road. This includes removal of brush and small trees, up to 10 inch in diameter at 4.5 feet from ground level.

Pruning of vegetation that could be ladder fuels in a fire situation, pruning along the bole of the tree, at least 10 feet from the ground.

Remove branches overhanging roadway to allow 10 foot overhead clearances for fire engines.

BEFORE

AFTER

Communities are a huge part of making these projects happen. If you know of a road that needs ingress/egress treatment fill out a project request form.

INGRESS/EGRESS PROJECT OBJECTIVE

Reduced hazardous fuels adjacent to roads (create fuel breaks), improve or create key evacuation corridors, improve access for firefighting equipment, and protect infrastructure along road ways.

AMADOR FIRE SAFE COUNCIL

The AFSC is a non-profit organization formed in 2002 with a volunteer board composed of local residents and stakeholders. We are active in the community and invest thousands of hours every year to benefit our neighbors.

MISSION STATEMENT

The mission of the AFSC is to protect *the people of Amador county and their property from the catastrophic effects of wildfire through education and outreach, innovation and action.*
